
PRESS RELEASE

DESIGNA at EPA 2017 in Rotterdam

Kiel, 18.09.2017: Turin 2011, Dublin 2013, Berlin 2015 and now Rotterdam! Once again this year, DESIGNA Verkehrsleittechnik GmbH will be appearing at the EPA Congress and Exhibition held by the European Parking Association.

From 20-22.09.2017, visitors to the DESIGNA exhibition stand (A 38) will be able to find out all about the world of parking, with easy to operate hardware and software trends that make working on site in the car park significantly easier for customers. These range from integrated and integrable services online and for smartphones, and Web & App innovations, through to the DESIGNA ASP Cloud Service. DESIGNA is looking forward to welcoming plenty of visitors and to interesting discussions with customers and other experts.

EPA Congress and Exhibition:

Every two years the EPA holds an international congress looking at how parking can work both today and in future. In over 30 presentations and workshops, representatives from policy-making bodies, industry and academia discuss aspects of traffic and transport trends in Europe's cities.

The accompanying EPA technical exhibition offers an even more practical opportunity for visitors to discover more of the innovations and smart solutions being developed for the world of mobility and parking management. Around 70 exhibitors are expected to attend in 2017.
